

DRAFT PROGRAMME

Using ICD-11 and International Classification of Functioning (ICF) for injuries and measuring the burden

South African WHO-Family of International Classifications Collaborating Centre
(SA WHO-FIC CC)

Faculty:

Dr Megan Prinsloo, SAMRC Burden of Disease Research Unit, WHO-FIC CC in South Africa
Prof Debbie Bradshaw, SAMRC Burden of Disease Research Unit, WHO-FIC CC in South Africa
A/Prof Soraya Maart, UCT Dept of Physiotherapy, WHO-FIC in South Africa
A/Prof Jean-Baptiste Sagahutu, College of Medicine and Health Sciences, Rwanda University
Dr Saman Gamage, CDC Foundation
Dr Brian Mankombwe, CDC Foundation
Dr Benson Droti, Health Information and Knowledge Hub, WHO AFRO
Dr Hillary Kipruto, Health Information and Knowledge Hub, WHO AFRO

Pre-conference workshop, 01 Sept 2026

08h30-16h45

Registration 8.30 - 9.00	
Session	Topic
Session 1 9.00-10.30	Welcome ICD-11 for coding and analysis of injury data - Overview of ICD-11 structure (illustrate with online tools) - Key principles for coding external causes of injury in ICD-11
TEA	
Session 2 11.00 – 12.30	Injury mortality surveillance - Applying the ICD framework in surveillance and surveys - Injury matrix eg child injuries
LUNCH	

Session 3 13.30 – 15.00	ICF for coding and analysis of functioning data related to injuries - Overview of ICF framework - Overview of ICF for coding functioning and disability due to injury
TEA	
Session 4 15.15 – 16.45	From coded data to burden estimates - Analysis of disability/functioning data related to injuries - Measures of injury burden Wrap-up

Workshop sponsors:

CDC Foundation

South African National Research Foundation

South African Medical Research Council
